I'm a creative and results-driven software developer, eager to provide business value by solving intricate technical challenges. As a continuous learner, I strive to follow best practices, stay up to date on new technologies, and improve existing skill sets to deliver outstanding solutions. Fostering collaborative environments, maintaining a positive outlook, and encouraging others are ways I contribute to the success of Agile teams.

Technical Skills

Tooling: Visual Studio and Visual Studio Code, PostgreSQL, MySQL, SQL Server, Git/GitHub, SoapUI, Postman, Jenkins, JFrog artifact repositories, NPM, Yarn, Jira, TravisCI, WebLoad by RadView, LeapWork Automation

Languages & Frameworks: .NET / C#, TypeScript / Angular, JavaScript / Vue.js

Experience

NOV 2021 - Present

Tyler Technologies, Plano, TX – *Software Developer*

- Drive the development of new features based on established requirements, emphasizing robust adherence to company standards.
- Maintain and enhance existing applications, resolving bugs and operational deficiencies.
- Guarantee program, module, and system integrity through comprehensive testing and rigorous adherence to industry best practices throughout the complete software development life cycle.
- Research, outline, and advocate the integration of new technologies and tools to enhance product value.
- Create thorough and understandable documentation of features in order to effectively communicate and collaborate.

MAY 2021 - NOV 2021

Tyler Technologies, Plano, TX – *Software Developer Intern*

- Contributed code changes for an Angular application that allowed for the selecting of certain HTML elements during functional testing.
- Actively participated in automated functional testing and load testing efforts.
- Built a custom HTML & CSS site which is now used as a template for clients' marketing websites.
